

COMPANY & PARTNER OVERVIEW

Container Connect USA

Container Connect USA sells and delivers new and used shipping containers to homeowners, farms, contractors, and businesses across the continental United States — one transparent delivered price, quoted instantly by ZIP code, with delivery handled end to end.

We are a sales and logistics company, not a yard. Containers ship from a network of more than 40 partner depots and terminals nationwide, matched to each order by proximity and availability. That model lets us sell in any market in the country without carrying the overhead of a single location — and it makes our suppliers and carriers the backbone of the business. This overview explains who we are, how an order moves, and what working with us looks like.

What we sell

Product	Details
New 40' High Cube	One-trip, 40' × 8' × 9'6", clean, wind & water tight
New 40' Four-Door High Cube	One-trip, four sets of side cargo doors for full-length access
New 20'	One-trip, 20' × 8' × 8'6", fits tighter driveways and job sites
Used 40' & 20'	Wind & water tight, dry, solid floors, doors open and lock
Container moves	Relocation of customer-owned containers, site to site, on tilt-bed trucks
Accessories	Lock boxes, shelving, vents, ramps and related fit-out products

Who buys: homeowners adding storage, farms and agricultural operations, construction and trades contractors, municipalities, and small-to-midsize businesses needing secure on-site storage. Most orders are single units; multi-unit and repeat commercial orders are a growing share.

HOW WE WORK

From quote to delivery — a system, not a scramble

Every order runs the same documented process, so suppliers and carriers always know what happens next and what we need from them.

- 1 Instant delivered price.** The customer enters a ZIP on our site and gets one itemized total — container plus delivery — computed from the depot that will actually serve them. No hidden fees, no surcharges added later.
- 2 Paid in full before release.** Checkout is a single card payment (Stripe) for the exact quoted amount. We never ask a depot to release, or a carrier to roll, on an unpaid order.
- 3 Site checklist.** Before dispatch, the customer confirms door direction, site surface and access, and a delivery-day contact. Carriers get the full picture — approach, overhead clearance, surface — before the truck is assigned.
- 4 Release, about a week.** We request release from the holding depot; the depot assigns the unit. The customer tracks status live on a password-free tracking page.
- 5 Delivery.** Tilt-bed delivery (shorter truck available for tight 20' sites). The driver calls 30–60 minutes ahead, places the unit per the paperwork, and photographs proof of delivery.

Working with suppliers

- **What we buy:** new one-trip and used wind & water tight containers — 20', 40', 40' high cube, and 40' four-door — plus accessories.
- **How we buy:** per-order releases against live inventory, paid promptly and in full. As volume grows in a region, we are interested in standing allocation and volume pricing conversations.
- **What we need:** current inventory and wholesale price lists by depot, release lead times, and a named contact who answers.
- **What you get:** a buyer actively expanding into new metro markets every month, with demand generated nationally rather than from one local yard.

Working with carriers

- **Equipment:** tilt-bed / rollback trailers for 20' and 40' units; shorter rigs for tight residential sites.
- **Load profile:** depot pickup to residential, farm, and commercial drop sites. Every load comes with the customer's site details, door direction, and a delivery-day contact — no blind drops.
- **Standards:** call-ahead on delivery day, placement as specified on the paperwork, photo proof of pickup and delivery.
- **Payment:** reliable, on agreed terms. Our customers have already paid in full before the load exists.

WHY PARTNER WITH US

Built to grow, easy to work with

Real demand, generated nationally

We actively sell in more than 30 metro markets across the country and are adding markets in waves. Every market launch is backed by live listings, local advertising, and an online quote engine that prices any US ZIP instantly. Partners plug into demand that already exists instead of waiting for the phone to ring.

A growth trajectory with a number on it

Container Connect USA was founded in 2025 and is scaling deliberately: our stated target is 400 containers sold in the next 12 months across the founding team, with volume per market compounding as new depots and carrier lanes come online. Early partners get the lanes and allocations while they are still being built.

Clean to do business with

- Customers pay in full, by card, before any release or dispatch — partners never carry our receivables risk.
- One named contact from quote to delivery on every order; every email replies to a real inbox.
- Prices shown to customers are honored as quoted — we do not renegotiate after the fact.
- A documented, automated order process: confirmations, status emails, and tracking at every step, so partner teams field fewer "where is it" calls.

What we are looking for

- **Suppliers:** depot inventory and wholesale pricing in any US region — especially new one-trip 40' high cube, 40' four-door, and 20' units, and used wind & water tight stock.
- **Carriers:** tilt-bed operators with regional or national reach, including capacity for tight residential deliveries and container relocation work.
- **Partners:** accessory manufacturers (dropship welcome), storage and construction channel partners, and referral relationships.
