COAST-TO-COAST CONTAINER SALES & DELIVERY

CONTAINER MOVES

Already have a container? We'll move it. Site to site, jobsite to jobsite, one property to the next — professional tilt-bed moves across New England and nationwide.

HOW IT WORKS

Four steps, door to door.

Moving a container isn't a phone-tag quote and a mystery truck. You price it yourself in under a minute, and the number you see is the number you pay.

1

UNDER A MINUTE

Price it instantly.

Open the "Move my container" calculator on containerconnectusa.com. Type your pickup and drop-off addresses, pick your container size and truck — the full price appears instantly. No callbacks, no waiting.

2

TWO MINUTES

Book it.

Pay by card through secure checkout. Your confirmation email has everything: both addresses, the truck assigned, and what to have ready.

3

BEFORE MOVING DAY

Prep both sites.

Empty the container completely. Clear a level spot at both ends with room for the truck to back in. That's the whole checklist — details on page 4.

4

MOVING DAY

We load, haul, and place it.

The driver calls ahead, loads your container at the old site, and sets it exactly where you want it at the new one. You don't lift a thing.

The price you see is the price you pay. Pickup, transport, and placement — totalled before you give us a dime. No fuel surcharges, no access fees added after the fact.

YOUR TRUCK

Pick the truck that fits.

Two trucks, one job: getting your container from A to B without drama. The calculator asks which one — here's how to choose.

STANDARD

Tilt-bed truck

The workhorse. Handles 20' and 40' containers on a hydraulic tilt bed — the bed slides back and tilts, and your container slides off exactly where you point. Needs a straight approach: about 60 ft for a 20', 100+ ft for a 40'.

TIGHT ACCESS

Short truck — 20' containers only

Built for tight driveways, narrow roads, and awkward turns a full-size rig can't make. Moves 20' containers only — if your box is a 40', it needs the full tilt-bed.

Not sure which one you need?

Measure the straight run the truck gets at both sites, and check for low branches, wires, and tight turns. If it's close, send us a photo of each spot — we'll tell you straight whether the short truck fits or you need the full bed.

Both sites, ready.

The move goes smoothly when both ends are ready before the truck arrives. Everything on this list applies to the pickup site and the drop-off site.

Non-negotiable

- **Container completely empty.** Everything out — we move the box, not what's inside it.
- **Clear, level ground** where the truck loads and where it sets the container down.
- **Doors secured** — latched shut and locked, or pinned fully open. Nothing swinging.

The approach

- **Straight, clear run** — about 60 ft for a 20', 100+ ft for a 40'
- **14 ft of overhead clearance** — branches and wires trimmed back
- **Cars, trailers, equipment** moved out of the truck's path
- **Gates unlocked** — or the code sent to us ahead of time

Soft ground? After heavy rain, a tilt-bed can sink or rut a lawn. If either site is soft, tell us ahead of time — a wasted trip helps nobody, and we'll plan around it.

What it costs, plainly.

Every move is different — distance, size, and truck — so we don't print one price. What we do instead: the calculator prices your exact move instantly, pickup address to drop-off address, and that's the total.

Where we move

New England and nationwide, from our Worcester, MA yard, our Newark, NJ partner depot, and 40 partner terminals across the country.

How you pay

Card in full at booking through secure checkout. Emailed receipt, no balance on moving day.

Straight answers

- **Does the container have to be empty?** Yes — completely. We move the box, not the contents.
- **Can you move a 40' down my narrow driveway?** The full tilt-bed needs about 100 ft of straight run. If it won't fit, a 40' can't go by short truck either — send photos and we'll be honest about it.
- **How fast can you move it?** Book through the calculator and pick your timing — we'll confirm the date by email.
- **What if the site isn't ready when the truck arrives?** Tell us ahead of time and we'll reschedule. A wasted trip costs everyone.
- **Do you move containers you didn't sell?** Yes — any standard 20' or 40' ISO container, whoever sold it.
